1 Title, affiliation and language

A shared section that applies to all BSc, part-time MSc and MSc Programmes at the Faculty of Science is linked to this programme-specific curriculum.

1.1 Title

The MSc Programme in Mathematics-Economics leads to a Master of Science (MSc) in Mathematics-Economics with the Danish title: *Cand.scient.oecon (candidatus/candidata scientiarum oeconomices) i matematik-økonomi*.

1.2 Affiliation

The programme is affiliated with the Study Board of Mathematics and Computer Science, and the students can both elect, and be elected, to this study board.

1.3 Corps of external examiners

The following corps of external examiners is used for the central parts of the MSc Programme:

- Corps of External Examiners for Mathematics (*matematik*).

1.4 Language

The language of this MSc Programme is English.

2 Academic profile

2.1 Purpose

The MSc Programme in Mathematics-Economics is a research-based interdisciplinary programme, the objective of which is to educate economists with a sound understanding of mathematics and statistics and the application of these disciplines within economic theory. Through a synthesis of the mathematical, statistical and economic fields of study, the mathematics-economist learns to handle theoretical and practical economic issues.

2.2 General programme profile

The study programme is an interdisciplinary programme offered by the Faculty of Science and the Faculty of Social Sciences with each faculty supplying a share of the compulsory courses. On the one hand, the study programme gives future economists with an interest in mathematics and statistics the opportunity to work with modern mathematical approaches and techniques. On the other hand, future mathematicians and statisticians obtain a good understanding of the areas of application of the economic subjects.

The programme's key subject areas are mathematics, statistics (including probability theory, data science and machine learning) and economics (including finance and operations research). Moreover, computer science is included in the programme as a subject.

2.3 General structure of the programme

The MSc Programme is set at 120 ECTS.

There are no defined specialisations in this programme.

2.4 Career opportunities

The MSc Programme in Mathematics-Economics qualifies students to become professionals within business functions and/or areas such as:

- Work within the financial sector.
- Economist positions requiring good analytical skills and use of mathematics, statistics and IT.

- Work within the public administration.
- Work within the consulting sector.
- A PhD programme

3 Description of competence profiles

Students following the MSc Programme acquire the knowledge, skills and competences listed below. Students will also acquire other qualifications through elective courses and other study activities.

3.1 Competence profile

Graduates holding an MSc in Mathematics-Economics have acquired the following:

Knowledge about:

- Selected research-active areas of economics and statistics, to a high level.
- Time-series analysis of financial data. Advanced macroeconomics with emphasis on monetary policy.

Skills in/to:

- Read and understand economic and statistical original literature.
- Communicate economic and mathematical issues on a scientific basis.
- Account orally and in writing for inquiries into open economic issues.

Competences in/to:

- Structure a study of open economic questions, especially of an econometric or finance-related nature and divide it into smaller easily accessible challenges.
- Further develop and adapt economic models for real-life challenges.
- Conduct independent, stringent argumentation.
- Independently take responsibility for the students own professional development and specialisation.
- Scientifically reflect on mathematical methods for analysing and resolving economic questions.

4 Admission requirements

4.1 Bachelor's degrees that automatically fulfil the academic requirements

Applicants with one of the following Bachelor's degrees automatically fulfil the academic requirements for admission to the MSc Programme in Mathematics-Economics:

- Mathematics-Economics (*matematik-økonomi*) from University of Copenhagen (reserved access)

4.2 Other Bachelor's degrees

Applicants with a Bachelor's degree, Professional Bachelor's degree or equivalent from Danish or international universities other than those listed in 4.1 are qualified for admission to the MSc Programme in Mathematics-Economics if the programme includes the following:

- | | |
|--|--------------------|
| • Subject elements in mathematical analysis | at least 22.5 ECTS |
| • Subject elements in linear algebra | at least 7.5 ECTS |
| • Subject elements in microeconomics | at least 15 ECTS |
| • Subject elements in macroeconomics | at least 15 ECTS |
| • Subject elements in mathematical finance, equivalent in content to the course NMAA05076U <i>Finansiering 1</i> | at least 7.5 ECTS |

- Subject elements in statistics on a measure theoretical basis at least 15 ECTS
- Subject elements in advanced probability at least 7.5 ECTS

For informational purpose - Bachelor's degrees that have previously been assessed as qualifying meeting the specified ECTS

Applicants with a Bachelor's degree in Actuarial Mathematics or Mathematics from University of Copenhagen are qualified for admission if the programme includes the following:

- Subject elements in microeconomics at least 15 ECTS
- Subject elements in macroeconomics at least 15 ECTS
- Subject elements in finance at least 7.5 ECTS
- Subject elements in statistics on a measure theoretical basis at least 15 ECTS
- Subject elements in advanced probability at least 7.5 ECTS

4.3 Other applicants

The Faculty may also admit applicants who, after an individual academic assessment, are assessed to possess educational qualifications equivalent to those required in Subclauses 4.1-3.

4.4 Language requirements

Applicants must be able to document English proficiency corresponding to one of the following:

- upper secondary school degree, bachelor's degree or master's degree in English from Australia, Canada, Ireland, New Zealand, United Kingdom or USA.
- Nordic entrance examination with an English level comparable to the Danish level B or higher
- International Baccalaureate (IB) from an international school
- European Baccalaureate (EB) from one of the approved schools
- English B or A as Single Subject Course in Denmark
- Abiturzeugnis from Germany
- IELTS test score of minimum 6.5
- TOEFL test score of minimum 83
- Cambridge Advanced English (CAE) or Cambridge English: Proficiency (CPE) passed at level C1 or C2

4.5 Supplementary subject elements

The qualifications of an applicant to the MSc programme are assessed exclusively on the basis of the qualifying Bachelor's degree. Supplementary subject elements passed between the completion of the Bachelor's programme and the admission to the MSc programme cannot be included in the overall assessment.

However, subject elements passed before the completion of the Bachelor's programme may be included in the overall assessment. This includes subject elements completed as continuing education as well as subject elements completed as part of a former higher education program. A maximum of 30 ECTS supplementary subject elements can be included in the overall assessment.

Subject elements passed before completing the Bachelor's programme which are to form part of the MSc programme to which the student has a legal right of admission (§15-courses) cannot be included in the overall assessment.

5 Prioritisation of applicants

With a Bachelor's degree in Mathematics-Economics from University of Copenhagen the student is granted reserved access and guaranteed a place on the MSc Programme in Mathematics-Economics if the student applies in time to begin the MSc Programme within three years of the completion of the Bachelor's degree.

If the number of qualified applicants to the programme exceeds the number of places available, applicants will be prioritised according to the following criteria:

- Total number of ECTS within mathematics, statistics and economics.

6 Structure of the programme

The compulsory subject elements, restricted elective subject elements and the thesis constitute the central parts of the programme (Section 30 of the Ministerial Order on Bachelor and Master's Programmes (Candidatus) at Universities).

6.1 Programme components

The programme is set at 120 ECTS and consists of the following:

- Compulsory subject elements, 15 ECTS.
- Restricted elective subject elements, 45 ECTS.
- Elective subject elements, 30 ECTS.
- Thesis, 30 ECTS.

6.1.1 Compulsory subject elements

All of the following subject elements are to be covered (15 ECTS):

Course Code	Course Title	Abbr.	Block	ECTS
NMAK24011U	Financial Econometric Time Series Analysis	FinMetrics	Block 1	7.5 ECTS
NMAK10018U	Macroeconomics 3 – Business Cycles and Monetary Stabilization Policy		Block 2	7.5 ECTS

6.1.2 Restricted elective subject elements

45 ECTS are to be covered as subject elements from the following list:

Course Code	Course Title	Block	ECTS
NMAK24007U	Brownian Motion (BM)	Block 1	7.5 ECTS
NMAK24000U	Stochastic Processes in Continuous Time	Block 1	7.5 ECTS

6.1.3 Elective subject elements

30 ECTS are to be covered as elective subject elements.

- All subject elements at MSc level may be included as elective subject elements in the MSc Programme.
- BSc subject elements corresponding to 15 ECTS may be included in the MSc Programme.
- All courses at Department of Economics SAMF are preapproved as elective courses.
- Projects. See 6.1.4 Projects.

6.1.4 Projects

- Projects outside the course scope (PUK) may be included in the elective section of the programme with up to 15 ECTS. The regulations are described in Appendix 5 to the shared section of the curriculum.
- Projects in practice (PIP) may be included in the elective section of the programme with up to 15 ECTS. The regulations are described in Appendix 4 to the shared section of the curriculum.
- Thesis preparation projects (PREP) may be included in the elective section of the programme with up to 15 ECTS. The regulations are described in Appendix 6 to the shared section of the curriculum.

6.1.5 Thesis

The MSc Programme in Mathematics-Economics includes a thesis corresponding to 30 ECTS, as described in Appendix 2 to the shared curriculum. The thesis must be written within the academic scope of the programme.

The principal supervisor can be from the Department of Economics, SAMF.

6.1.6 Academic mobility

The curriculum makes it possible to follow subject elements outside the Faculty of Science.

For students admitted in September the academic mobility in the MSc Programme in Mathematics-Economics is placed in block 1+2 of the 2nd year.

For students admitted in February the academic mobility in the MSc Programme in Mathematics-Economics is placed in block 3+4 of the 2nd year.

Academic mobility requires that the student follows the rules and regulations regarding pre-approval and credit transfer.

In addition, the student has the possibility to arrange similar academic mobility in other parts of the programme.

7 Exemptions

In exceptional circumstances, the study board may grant exemptions from the rules in the curriculum specified solely by the Faculty of Science.

8 Commencement etc.

8.1 Validity

This subject specific section of the curriculum applies to all students enrolled in the programme – see however Appendix 2.

8.2 Transfer

Students enrolled on previous curricula may be transferred to the new one as per the applicable transfer regulations or according to an individual credit transfer by the study board.

8.3 Amendment

The curriculum may be amended once a year so that any changes come into effect at the beginning of the academic year. Amendments must be proposed by the study board and approved by the Dean.

Notification about amendments that tighten the admission requirements for the programme will be published online at www.science.ku.dk one year before they come into effect.

If amendments are made to this curriculum, an interim arrangement may be added if necessary to allow students to complete their MSc Programme according to the amended curriculum.

Appendix 1 The recommended academic progression

The table illustrates the recommended academic progression. The student is allowed to plan an alternative progression within the applicable rules.

Appendix 2 Interim arrangements

The Shared Section of the BSc and MSc Curricula for Study Programmes applies to all students.

The interim arrangements below only consist of parts where the current curriculum differs from the rules and regulations that were previously valid. Therefore, if information about relevant rules and regulations are missing, it can be found in the curriculum above.

1 General changes for students admitted in the academic year 2024/25

Students admitted to the MSc programme in the academic year 2024/25 must finish the programme as listed in the curriculum above with the following exceptions.

Restricted elective subject elements

45 ECTS are to be covered as subject elements from the following list:

Course Code	Course Title	Block	ECTS

Appendix 3 Description of objectives for the thesis

After completing the thesis, the student should have:

Knowledge about:

- Scientific problems within the study programme's subject areas.
- A suitable combination of methodologies/theories based on international research for use in the students work with the problem formulation.
- Theories/models on the basis of an organised value system and with a high degree of independence.

Skills in/to:

- Apply and critically evaluate theories/methodologies, including their applicability and limitations.
- Assess the extent to which the production and interpretation of findings/material depend on the theory/methodology chosen and the delimitation chosen.
- Discuss academic issues arising from the thesis.
- Draw conclusions in a clear and academic manner in relation to the problem formulation and, more generally, considering the topic and the subject area.
- Discuss and communicate the academic and social significance, if any, of the thesis based on ethical principles.

Competences in/to:

- Initiate and perform academic work in a research context.
- Solve complex problems and carry out development assignments in a work context.
